< FUNCTIONAL SPECIFICATION />

PROFILSACTIFS

Ministère du Job et Bonheur, Digital and Innovation Directorate

Reference: JEB/DNI/2026-003

Version: 1.0, for selected technical service providers

Your contacts within the ministerial cabinet:

- ✓ Florine Pontailac, legal advisor
- ✓ Thomas Vignal, digital advisor
- ✓ Benjamin Sellami, communications advisor

1. Institutional context

As part of the digital strategy of the Ministère du Job et Bonheur and in response to new professional communication practices, **ProfilsActifs** proposes an innovative approach to showcasing job seekers' skills.

Starting from the observation that traditional resumes do not always allow candidates to stand out, Pro-filsActifs introduces a short-video presentation format, coupled with a professional aptitude certification system. The scheme aims to streamline the matching between job seekers and recruiters, drawing on communication formats suited to contemporary usage.

2. Description of the expected service

2.1 Functional scope

Job seeker space:

- ✓ Creation of a professional profile (identity, skills, target sector, location)
- ✓ Publication of presentation videos (external link or upload depending on technical constraints)
- ✓ Completion of the JEB professional certification questionnaire (obtaining a badge displayed on the profile)
- ✓ Tracking of interactions received (views, recruiter contacts)

Recruiter space:

- ✓ Access to the catalog of job-seeker profiles
- ✓ Filtering by skills, sector, location, certification status
- ✓ Interaction with profiles (making contact, marking favorites)
- ✓ Dashboard tracking contacted candidates

Administration space:

- ✓ Moderation of profiles and video content
- ✓ Management of the certification questionnaire (editing questions, weightings)
- ✓ Global dashboard (active profiles, certification rate, interactions)

2.2 Professional certification questionnaire

The certification questionnaire is a central element of the scheme. It allows job seekers to showcase their transversal skills (communication, organization, adaptability) and to distinguish their profile by obtaining an official JEB certification badge.

The questionnaire comprises a significant number of questions, to be defined jointly with the Communications Directorate, to guarantee the robustness and legitimacy of the certification.

Questionnaire results are displayed on the candidate's profile as a score or badge.

2.3 Priority functional requirements

- ✓ The profile must be publicly viewable without a recruiter account (to maximize candidate visibility)
- ✓ The certification badge must be visually distinct and prominently displayed on the profile
- ✓ Videos may be embedded via link (YouTube, Vimeo) or direct upload depending on hosting constraints
- ✓ A notification system must inform the candidate of any new recruiter interaction

3. Technical constraints

3.1 Architecture

- ✓ Responsive web application (mobile and desktop)
- ✓ Backend with relational database
- ✓ Documented RESTful API
- ✓ Multi-role authentication (job seeker / recruiter / admin)

3.2 Video

- ✓ Video embedding via iframe (YouTube, Vimeo) is accepted for the demonstrator version
- ✓ If direct upload is implemented, files must be size-limited (max 100 MB per video)
- ✓ A video preview must be possible without leaving the profile page

3.3 Visual identity

The solution must comply with the visual identity elements of the Ministère du Job et Bonheur. A style guide will be provided by the Communications Directorate. Until then, use a sober and professional palette.

3.4 Performance

- ✓ The profile feed must be paginated (20 profiles per page maximum)
- ✓ The certification questionnaire must support saving progress mid-session (resumable after interruption)

4. Expected deliverables

Week 1: proof of concept (Friday project review)

- ✓ Browsable profile feed (with at least 5 fictitious profiles integrated)
- ✓ Job-seeker account creation with basic profile and one video integrated
- ✓ First version of the questionnaire (even partial)
- ✓ Oral presentation: functional demo + product positioning

Week 2: final version (Thursday technical review + Friday keynote)

- ✓ All functional spaces (job seeker, recruiter, admin)
- ✓ Complete certification questionnaire with badge display
- ✓ Operational recruiter-to-candidate interaction system
- ✓ Technical documentation
- ✓ Project retrospective

5. Points of attention

ProfilsActifs is a skills-showcasing tool, not a social network. The engagement dimension (likes, shares) is not within the scope of the demonstrator version. The goal is professional matching, not virality.

Document issued by the Digital and Innovation Directorate, Ministère du Job et Bonheur. Version pending validation before final distribution.
